

Dear Parents,

One of the many digital tools we use at Rhea is a platform called ClassLink. This platform contains many of the websites and applications your child uses while at school. In order to access ClassLink, your child will need their personal quick card. An example of a quick card is shown below:

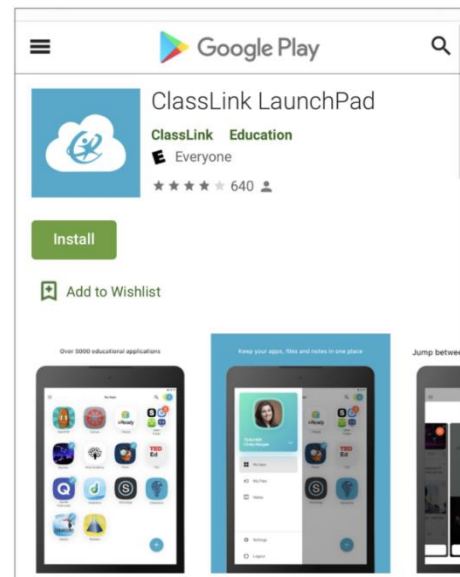

In order for your child to use ClassLink, you will need a computer with a camera or you can download the ClassLink application for Android or iPhone. To use the platform from a computer, go to Rhea's webpage and click on the ClassLink icon. If using the platform from a mobile phone, go to your phone's app store, search for ClassLink Launch Pad. Screenshots of the application are shown below:

Apple phones or iPads:

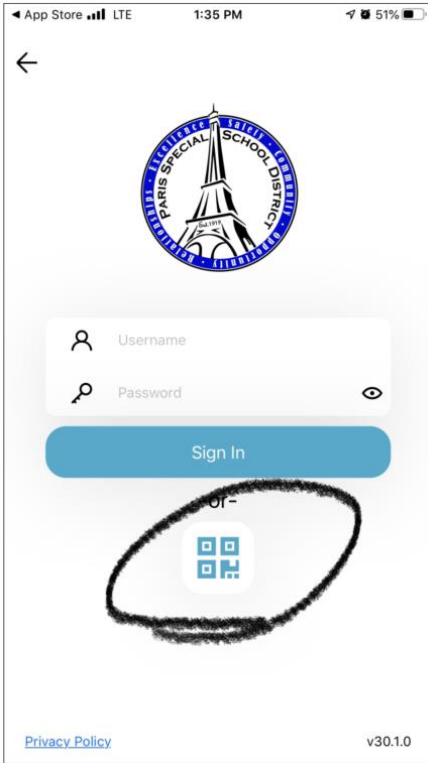

Android phones or tablets:

Once you have the application installed on your device, launch the application, and in the search bar type in "Paris Special SD".

On the next screen, tap the icon circled in the next screenshot.

Allow your device to use your camera, then scan the code on the quick card.

If you need additional help or need your student's quick card, please email training@parisssd.org
